## YOUR DOORBIRD INTERCOM CAN NOW CALL YOUR TELEPHONES

Why use **ittendant** service? IP intercoms are now the new standard. In some cities, entry intercom is required by law. App based mobile communication may not be enough or appropriate for every situation. **ittendant** by AVLinkPro™ provides a simple way to provide a communication link to any telephone, anywhere. Someone comes to the door and rings apartment 108, the call goes to a phone number provided by the apartment dweller. This could be a landline or cell and each resident can have up to 5 different telephone numbers all at once or in sequence per residence. **ittendant** service can also be used in commercial buildings as well as in schools. Anywhere you would find a DoorBird intercom.

SIP Intercom  Telephone

# ittendant

Door intercom communication over your existing telephones or cell phones and much, much more!

## What does Ittendant do?

Ittendant is a service that is powered by AVlinkPro™. It's designed to connect a SIP based intercom systems to other systems like telephones and other IP based communication interfaces.

## How does Ittendant Work?

Ittendant service allows your DoorBird IP intercom to automatically dial residences via the telephone. The system can dial up to 5 numbers to communicate with the resident. Residents can use a standard or cellular telephone and can even activate door locks relays via the phone's dialing keypad.

Ittendant provides a unique web interface that allows the resident the freedom to connect and **change their own phone numbers at whenever they wish.**

Ittendant is a unique cloud service that is powered by AVlinkPro™ and is designed to connect SIP based intrercom systems to other systems like telephones and other IP based communication interfaces.
