Faster Deployment

Makes it easy to setup multiple users and deploy **DoorBird** devices quickly & efficiently with bulk settings uploads and device cloning.

Cloud Backup/Restore

Facing a replacement or upgrade? Easily re-deploy Your **DoorBird** settings with a click of a button. The **Ittendant** Cloud maintains the backup so it will be ready access

Access/Usage Logs

Easily access communication and traffic logs essential to operation and security of a property with a few clicks of a mouse.

Device Notifications

Get email or SMS messages every time a device allows access or goes offline. Set alerts anytime to anyone anywhere.

Unified Management

Combine your **DoorBird** access control and communications under one login. Creates a unified platform that is easy and complete.

Maintaining Users

Ittendant portal allows installers and property management the ease of updating user information and adding new clients. Notifies you if devices are not connected.

White Label Reseller

Installers can white label the admin and customer portals so there can be a custom Identity to match a business or property.

Intercom to Telephone

Installers can enable their **Ittendant** Intercom to Telephone service solution from the enterprise portal.
